CEO Message

Ghassan Abu Safi

CEO

As one of the leading companies in its sector, Orion Contracting Company "OCC" focuses on providing comprehensive solutions to fulfill our clients' needs. Our focus on industrial and commercial buildings require us to employ full teams of highly skilled workers that will ensure environmental considerations.

Our involvement in helping our clients construct their ideas start from the very beginning. We provide our vast engineering experience in different building types from scratch and proceed to help with every step to provide the best construction solutions by incorporating our value engineering alternatives supported by groups of skilled engineers that cover all of our construction activities.

By having in-house civil, MEP, steel erection, joinery and precast division, OCC grants a full control in the required construction resources. This enables us to plan and execute our projects with the highest commitments and smoothness.

In OCC, our goal goes beyond your satisfaction

Introduction

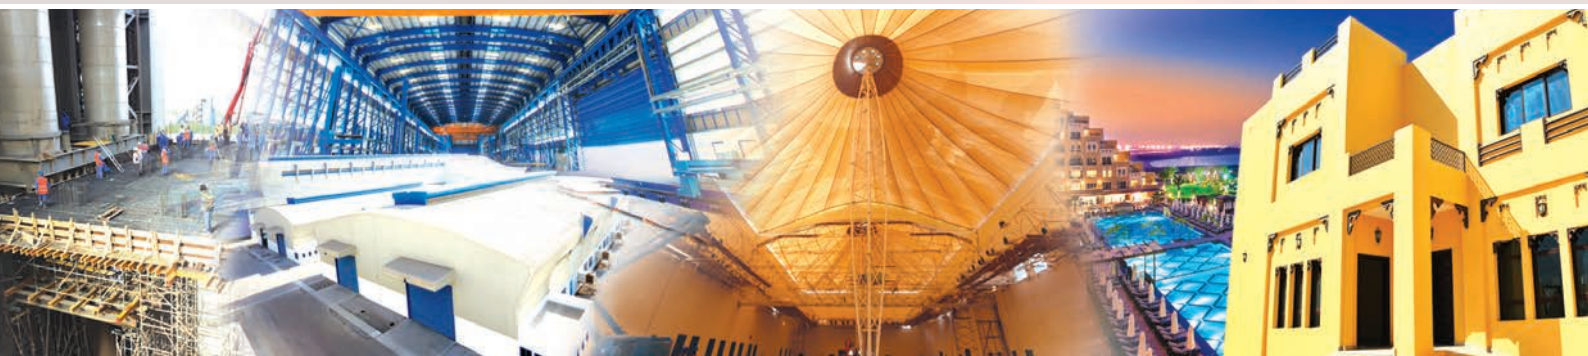

Orion Contracting LLC, established in 2008, is a group of companies, specialized in the construction of Industrial, Commercial, Institutional, Residential Complexes and Infrastructure Construction Industry throughout U.A.E.

We pride from the fact that our business is built around people offering excellence and assured quality product, with a commitment for the highest technical and managerial abilities, while at the same time prioritizing safety and incorporating up-to-date technology, modern and traditional construction.

Orion Contracting LLC runs full operations from offices located in Abu Dhabi, Dubai and Ras Al Khaimah, in addition licensed and registered in Al Ain, Ajman, Fujairah, Sharjah and Umm Al Quwain.

Orion Contracting LLC is specialized in Industrial and Commercial Constuction with design build abilities in civil and MEP.

Orion Contracting LLC occupies over 1700 experienced employees in various specialties in addition to wide range of construction equipment's and special technologies to support delivery of various construction projects within the demanded time and quality.

Introduction

OPTION

Vision Mission
Core Value

Vision

To create the most reliable name in construction industry through the region, by continuing to provide and develop high quality services and investing in the latest technology infrastructure.

Mission

Our mission is to provide general contracting services to our clients, distinguishing us from others, based on the needed time, budget and quality, in order to surpass the customer expectation. We aim also at achieving the best quality, while at the same time, respecting health and environmental standards.

Core Value

EFFICIENCY: to offer the best **quality** of services based on the given requirements, **time** and **budget** and employing the latest technology.

RELIABILITY: to deliver services on time.

DEVELOPMENT: being up-to-date with the latest developments taking place in the construction industry worldwide and adapting them to the local market

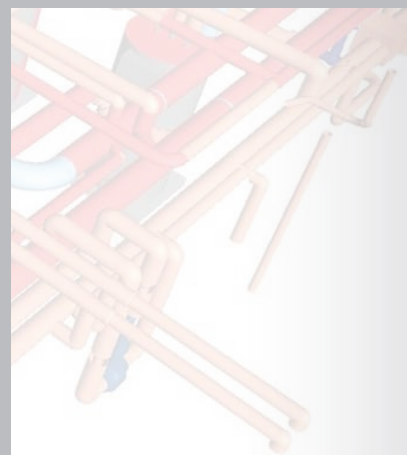

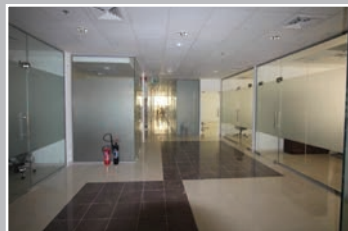

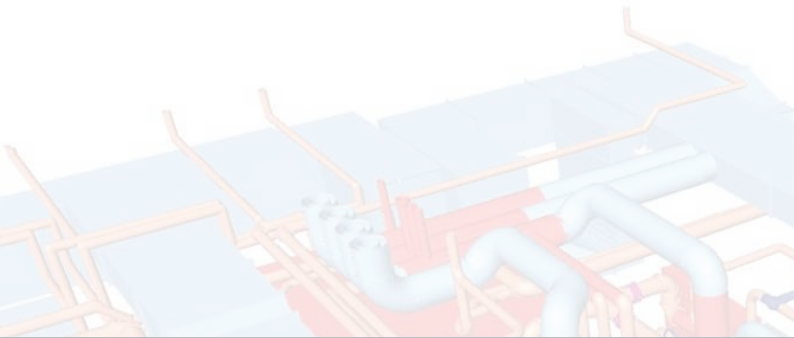

ACCOUNTABILITY: being responsible for what we do and what we represent.

Orioncc since day one establish a separate team for the MEP construction activities to be able to give a full in house design and build service, this team cover all MEP work including but not limited to plumbing, draining, air conditioning, fire fighting and all electrical services, moreover Orioncc get license as electrical contractor approved from FEWA in addition to fire fighting and fire alarm license approved from civil defense department under the name of **Orion Anti fire.**

MEP

Enterprise Resource Planning (ERP)

Accounting Payroll Inventory Management

In Orion Contracting Company we are using Enterprise resource planning (ERP)

for managing our organization business and back office functions related to technology, services and human resources.

It includes the **Accounting, Job costing, Fixed Assets, Inventory / Procurement Management, as well as Payroll and Personal Systems.**

ERP System help us profitably grow our business and improve competitiveness.

Main Features

- Create and Maintain Multi branch and financial year.
- All reports are available for any given period and manage to take print or to file.
- Multi users can able create in a license edition and user level access permission can be given for all modules and functions with their respective usage.
- User defined codes can generated for different modules to control the flow of accounting.

Common Functional Features

- Transaction entry: Document number is generated automatically and common for all the branches. In transactions documents can be deleted after saved, but after the confirmation, transactions can't be deleted.
- List of values: All transactions has list of values for each field. The pop-up list containing the required field content, it can easy for selecting the options.
- Confirmation of Documents, Data Retrieval and Modification: Each kind of functions in the modules has

3 stages update, pass, and confirmation. Data can be retrieved in all forms by selecting Query from the menu and clicking on Executed. This would retrieve all the records from the table and the first record in the database is displayed.

General Ledger

General Ledger enables global data management and enhances financial controls like journal entries, sub ledgers, chart of accounts, trial balances, profit & loss account, balance sheet etc. and reports can generate as per the period options.

Accounts Receivables & Accounts Payables

In AR/AP payables system maintains debtors/ creditors accounts details, invoice, payments against purchase journal, outstanding payments, subcontractor statements, advance, retention and payable in account wise. Statements of accounts in client, supplier and job wise is possible.

Job Costing

Here jobs can be created for projects, expenses, maintenance etc. Each job budgets can be controlled for specified stock items in the inventory process for the projects and other expenses.

Payroll and Personnel System

Payroll and Personnel system is fully integrated with other Modules, each details of an employee can be maintain with respective to entry and exit of a person through employee master, payroll, pay slip, cash analysis and other benefits. Time sheet of each employee is update online and respective reports can be generated for settlement and other uses.

Enterprise Resource Planning (ERP)

Fixed Assets System

Assets is helps us maintain an accurate property and equipment inventory, and ensures that we always choose the best accounting strategies. Fixed assets is entered in the transaction and maintain the balance because of the integration between modules and maintain the depreciation rate changes.

Inventory / Procurement System

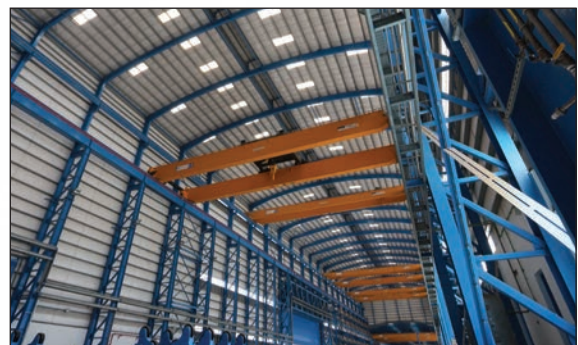

Inventory and procurement system allows us to raise a material requests as per the project budget it was confirmed for purchase order through a transaction like material requisition, approval, request for quotation, supplier quotation, stock mastering and LPO is generated according to the confirmation.

Orion's Capabilities

Orion Contracting LLC has proven capabilities in providing the following services to Clients /End-users:

- **Design-Build & Turnkey Construction of Commercial & Non-Process Buildings.**
- **Industrial Construction.**
- **Steel Construction.**
- **General Construction.**

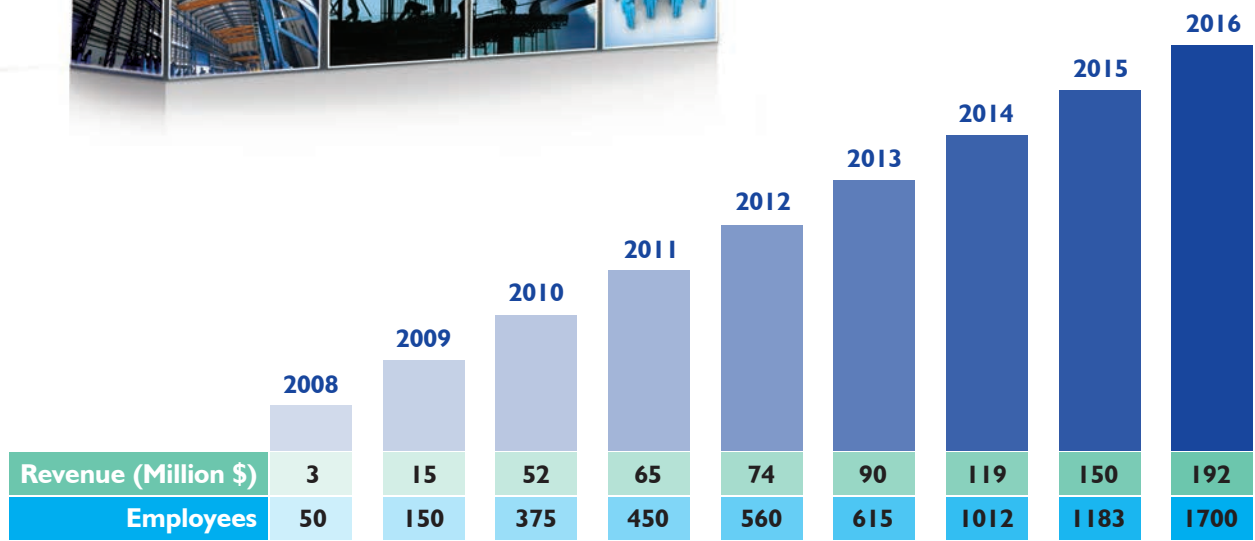

Structured Growth

Orion's success has centered on a strongly networked, decentralized model of small offices compared to a large cumbersome centralized structure.

- Standardized and shared common policies and procedures coupled with a strong IT network and MIS systems provide the advantages of a large group while maintaining the flexibility and quick reaction of smaller offices.

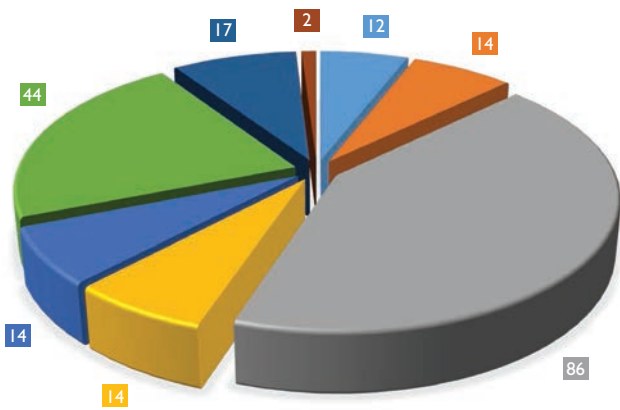

Sample Clients

The combination of the ORION's decentralized management model and its presence through 1000 plus employees across UAE ensures its ability to provide clients with excellence and assured quality product, with a commitment for the highest technical and managerial abilities, while at the same time prioritizing safety and incorporating up-to-date technology, modern and traditional construction.

ORION prides itself in building reputation on its ability to provide solutions for fast-track projects for clients like:

Approach to Health, Safety & Environment

Work Force Environment
 Safe Work Methods HSE Systems
 Accident Investigation

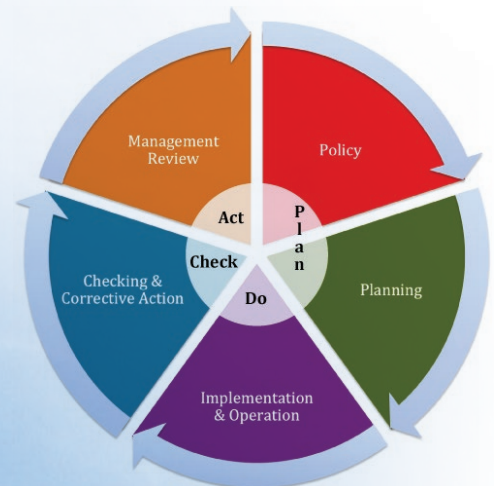

Sustainability

Orion recognizes the important of addressing sustainability in today's world, which is grounded by the guiding principles of social responsibility, environmental stewardship, and economic growth, so that future generations are not compromised by actions taken today. Orion realizes this challenge by acting as a responsible business partner and employer putting sustainability atop out agenda.

The EHS system is specific to the requirements of each project, Orion identifies all EHS aspects including potential hazards for each project. The EHS plan is then developed, implemented and maintained throughout the project lifespan and ensures that all personnel including subcontractors are aware of, and are committed to the system.

Safety Overview

Orion has a comprehensive Environment, Health and Safety (EHS) management system implemented to ensure the well-being of all employees. The management is committed to the successful execution of all projects and the establishment of an accident-free record.

Approach to Health, Safety & Environment

The plan identifies and establishes resources essential to the implementation and control of the EHS system. The plan analyses on-site accident prevention and considers comprehensive safety requirements for:

- Work Force
- Environment
- Safe Work Methods
- Accident Investigation
- Orion has deployed a quarterly Safety Award system to honor employees that have demonstrated significant awareness towards overall safety on site.
- Orion's experience includes work in confined spaces with exposure to toxic gases such as inside power plants, over live gas pipe lines, gallery modules and other confined spaces.

■ In addition, Orion's experience also includes steel erection up to a height of 60 meters with the necessary safety and 'work at heights' practices in place.

Environment

Orion is committed to sustainable development through our operations which cover a wide range of industrial sectors. Continual improvement in environmental performance is achieved by setting objectives, measuring progress and communicating results.

- The environment plan also outlines required standards of housekeeping and these segregation of waste materials.
- Orion achieves his by:
 - Complying with all applicable environment laws, regulations, statutory obligations and relevant voluntary codes of practice.
 - Maintaining environmental management systems that are appropriate to the nature and scale of our business.
 - Ensuring that our employees, subcontractors, suppliers and consultants area ware of and have the necessary Skills to fulfill their environmental obligations.
 - Working with clients and other stakeholders to help them achieve their environmental objectives and obligations.

Approach to Quality Control/ Assurance

Policy Statement – QMS

Orion continually seeks to improve its total Quality Management System towards higher customer's satisfactions by refining its Project Delivery System in line with international standards.

Orion's quality management program has been formulated to ensure a commitment to quality in all company activities from Tendering stage, till post project handover stage.

Orion Contracting LLC prides itself from the fact that its business is built around people offering excellence and assured quality product, with a commitment for the highest technical and managerial abilities.

Quality objectives are set in each department in line with the Company Vision, Mission & objectives.

At Orion Quality Management system as per the guidelines of ISO 9001:2008.

ISO Certification

Below is the brief how quality management is ensured in the company:

Quality objectives are set in each departments and is reflected in the job description of each employees in line with company's plans & objectives.

Quality Management System Orientations are conducted to the employees to make sure they fully understand and commit to apply at work.

Quality Management System Orientations to project QA/QC Staffs on Quality requirements and Design codes in projects.

Al Nhakeel Hygienic Paper Mill

Al Nhakeel Hygienic Paper Mill

Al Nhakeel Hygienic Paper Mill

Client	: Al Nhakeel Hygienic Paper Mill
Consultant	: Consultant Engineering Group
Plot Area	: 143,775 m ²
Built up Area	: 42,000 m ²
Completion Date	: November 2017
Scope	: Turnkey Civil, Architectural & MEP
Location	: Abu Dhabi, ICAD II

The Project Consist of 5 Main Buildings as follows:

- Paper Mill Factory with built-up area of 15,000 m² material will be transferred into jumbo roll of tissue paper.
- Jumbo roll storage with an area of 10,000 m².
- Converting hall with area of 9,500 m² where tissue roll will be cutted and backing into sizes and shapes.
- Finished goods store area 5,200 m².
- Administration building area 2,000 m².
- Service blocks and external blocks.

Air Liquide Middle East Manufacturing

Air Liquide Middle East Manufacturing

Plant & Factory, Storage Shed, Office and Miscellaneous Works

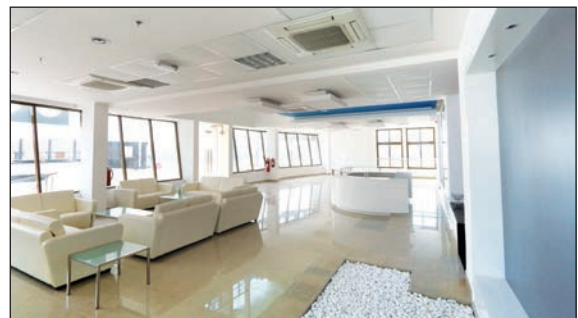

Client	: Air Liquide Middle East Manufacturing
Consultant	: AUK Infracon FZE
Plot Area	: 143,775 m ²
Built up Area	: 115,000 m ²
Completion Date	: June, 2014
Scope	: Turnkey (Complete Civil, Structural Steel, Architectural, MEP and Miscellaneous works) Air Liquide, the century old manufacturing leader with it's headquarter in France, awarded the construction of this facility in RAK Maritime City.
Location	: Al Kwair, Ras Al Khaimah

The project consists of Office Building with state of the art finishes as follows:

- Office Building – 2,700 sqm,
- Factory Building (Shop 1,2,3) – 20,000 sqm
- Shop4 – 4,900 sqm
- Shop5 – 4,900 sqm
- Shop6 – 4,900 sqm

Utility Building 1280 sqm

- Utility Building 2360 sqm
- Cold Box Area and Goliath Crane – 49000 sqm
- Paving Area (Interlock / Kerbstore) – 25,000 sqm
- Security Building 180 sqm
- Security Building 220 sqm
- Boundary Wall with Chain Link Fence & Gates.
- STP (Sewage Treatment Plant)
- ETP (Effluent Treatment Plant)
- Open & Covered Parking
- Green Area (Soft - Landscaping) – 3,000 sqm. etc.

Streit Group FZE

Streit Group FZE

Construction of Proposed Building Complex for M/s Streit Security Vehicles FZE at Technology Park

Client : Streit Group FZE
Consultant : Milestone Engineering
Built up Area : 29,299M²
Completion Date : March 2015
Scope : Turnkey (Complete Civil, Structural Steel, Architectures, MEP and Miscellaneous works).

The project includes the construction of a new glass factory building, research, development building, and the storage warehouse along with their office buildings on a turnkey basis. Which includes complete civil, structural steel, architectural and MEP works. The interior and external finishing and miscellaneous works which is an ongoing stage.

Falcon Pack

Anchor Allied LLC

Anchor Allied Construction of Factory Shed, Labor Accommodation and Office Building

Client : Anchor Allied LLC
 Consultant : Capital Engineering Consultancy
 Built up Area : 12,230.0 m²
 Completion Date : August 2015
 Location : Al Ghail - RAK
 Scope : Turnkey (Complete Civil,
 Structural Steel, Architectural, MEP and External Work)

Universal Carton Industries LLC

Universal Carton Industries LLC Construction of Factory Shed, Labor Accommodation and Office Building

Client : Universal Carton Industries LLC
Consultant : Al Ain Consulting Engineers
Built up Area : 11,550.0 m²
Completion Date : October 2015
Location : Al Ghail - RAK
Scope : Turnkey (Complete Civil,
Structural Steel, Architectural, MEP and External Work)

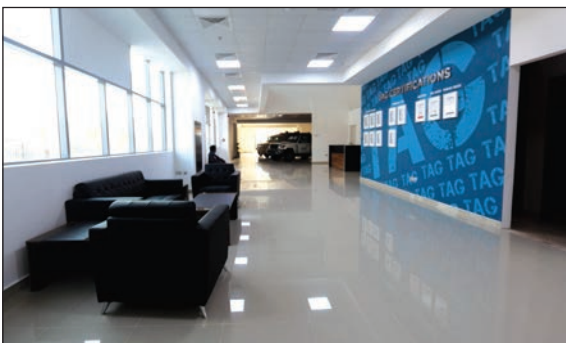

TAG International

TAG International Construction of Factory Shed, Labor Accommodation and Office Building

- Client : TAG International
- Consultant : Home of Architect
- Built up Area : 13,960.0 m²
- Completion Date : April 2016
- Location : Technology Park – RAK
- Scope : Turnkey (Complete Civil, Structural Steel, Architectural, MEP and External Work)

Union Cement Factory PSC

Extension of Union Cement Factory

Client : Union Cement Factory PSC
Built up Area : 18,000 sqm
Completion Date : July, 2009
Location : Kwair
Scope : Turnkey (Complete Civil, Structural Steel, Architectural, MEP and Miscellaneous works)

The facility combines RAW, Clinker & Coal Sheds built for the storage of raw materials and built with pre-engineered steel building weighing 1000 tons structural steel. The project included all the civil, structural steel, mechanical, electrical & plumbing/ drainage works, and additional external works completed in less than 10 months duration on a fast track basis.

Orion was highly appreciated for fast track construction of this project, quality construction & professional service of Orion team.
